Syllabus of e-Typewriting - English/Hindi (Code No. 354)
Class IX-Class X
2011-2013

INTRODUCTION:

With the advent of computers and internet connectivity, the information revolution has affected all facets of life. Information plays a vital role in the conduct of business to initiate and maintain continuous contact with customers/clients, suppliers, investors, govt. agencies, banks, insurance companies etc. and in order to exchange information, letters, memos, notices, circulars, reports etc. are written regularly. As the information is mostly fed directly through a keyboard, keyboard & word processing skills are of utmost importance for efficient and effective information exchange.

In this context, e-typewriting is a primary skill in order to efficiently handle information. CBSE has decided to meet this challenge in the emerging scenario in India which demands competence in terms of speed, accuracy and information management skills. The conventional course in typewriting is renamed as e-Typewriting i.e. Electronic Typewriting. Every care is being taken that the candidate is able to perform well in English along with elementary hands on skill in Hindi as well through INSCRIPT keyboarding, which facilitates extension to any other Indian language. Similarly, e-typewriting in Hindi would require some basic hands on skills in English as well.

The students of e-typewriting course are also encouraged to acquire some basic Internet skills which will only be for practice and not to be tested.

It is expected that after doing this course the students will be able to get jobs in the government and private offices, micro, small & medium enterprises in organized and unorganized sectors, large industrial units, call centers, publishing houses, banks, insurance corporation offices and data centers in educational institutions etc. The students can get self-employment by taking up job works from the nearby offices, schools, colleges and universities. Besides opening up job opportunities, the Course also helps in giving a competitive edge to the students in higher studies.

**Learning Objectives of e-Typewriting course**

After completion of this course, the students will be able to:

1. Use proper keyboarding techniques.
2. Improve speed and accuracy while keyboarding.
3. Create and edit a variety of documents using word processor and spreadsheet software.
4. Identify and correct common typing errors.
NOTE

This paper has been divided into two parts i.e. Theory and Practical. The division of marks of Theory and Practical is as given below:

   10 Marks

---

**Total Marks: 70**
The purpose of Assignment file extends much beyond the formality. The Assignment file should reflect and measure a student’s continual improvement in e-Typewriting. An Assignment File must contain one document per month (in total 3 documents per term). Every month, an initial document without carrying out corrections is to be kept in the file which will be known as initial document. The same document should be typed by carrying out corrections, which will be known as final document. Both of these documents must be duly signed by the Instructor. (Private candidates may put self-attested test documents)

An analysis report, for each term, may be prepared by each student in the following format with self-assessment:

<table>
<thead>
<tr>
<th></th>
<th>Month 1</th>
<th>Month 2</th>
<th>Month 3</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Initial document</td>
<td>Final document</td>
<td>Initial document</td>
</tr>
<tr>
<td>Speed</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Accuracy</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Word Processing / Spreadsheet features used</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

An additional analysis report at the end of Second Term may be prepared by each student in the following format with self-assessment of speed and accuracy:

<table>
<thead>
<tr>
<th></th>
<th>Term 1</th>
<th>Term 2</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Month 1</td>
<td>Month 2</td>
</tr>
<tr>
<td>Speed</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Accuracy</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

State your inference about your project report:

These assignments will help the student to know whether s/he is continually improving his/her performance or not. It will also help the teacher in analyzing the class performance.

To encourage self-assessment by student; it is suggested that marks be allotted only for completion of the original work without assessing the speed and accuracy reported by the student.
