IT INITIATIVES & ACHIEVEMENTS

1) VIDYA SAMIKSHA SOFTWARE

“सागर से सारांश” R 3.0

(Bird's eye view of CBSE Ecosystem)

Introduction

In its vision for building a future-oriented education landscape, the National Education Policy (NEP) 2020 prioritizes data-driven decision making, data analytics, and data-driven governance. This policy recognizes data as the cornerstone for tracking and monitoring educational activities, enabling continuous improvement. To bridge the gap between data and actionable insights, the Central Board of Secondary Education (CBSE) undertook the ambitious Sagar se Saransh (Sqube) initiative, which aligns with the National Digital Education Architecture (NDEAR) – a government initiative to establish a unified digital infrastructure for education. NDEAR emphasizes the importance of data interoperability and accessibility, creating the foundation for Sagar se Saransh. Prior to Sagar se Saransh, challenges like presence of data in silos and inaccessible information, manual data analysis and inefficiencies, limited visibility and lack of actionable insights, inconsistent reporting and difficulty in monitoring progress, hindered CBSE's ability to leverage data for informed decision-making and optimize educational experiences.

The **Vidya Samiksha Software (Sqube)** as “सागर से सारांश”, is a robust data-driven analytical platform designed to provide a bird's eye view of the CBSE ecosystem and granular insights at various operational levels. **Vidya Samiksha Software (Sqube)** “सागर से सारांश” an advanced suite of features

aimed at empowering stakeholders, including district-wise and school management group-wise 360° views of schools, enabling informed decision-making and strategic interventions. The platform provides tailored dashboards for schools, foreign institutions, and for various sister organisations such as Kendriya Vidyalaya Sangathan (KVS) and Navodaya Vidyalaya Samiti (NVS), offering detailed insights into their performance, trends, and compliance. Cutting-edge AI/ML-based predictive models enhance the platform's capabilities with “What-if” scenario analysis for dropout predictions (Classes IX to X), average marks (Classes X and XII), and other key metrics. Comprehensive examination question paper analysis, grade analysis, and theory-practical correlation for board examinations allow in-depth evaluation of academic outcomes. VSK also incorporates data forensic tools to detect malpractices, dropout and left-out trend analysis, and a correlation analysis between categorical and numerical school parameters. Enhanced geospatial tools provide road/air distance mapping and location-specific performance data, while the Historical Information Repository of Schools (HIROS) module highlights compliance violations. Together, **Vidya Samiksha Software (Sqube)** “सागर से सारांश” establish a transformative ecosystem, fostering transparency, accountability, and continuous improvement across the education landscape.

Objective

To address these challenges and empower CBSE with a robust data analysis system, Sqube was developed with the following objectives:

1. Assimilation of data from various departments in silos at one platform for removal of redundancy
2. Single source of truth for all kinds of data related to various programs, initiatives, schools, teachers, students etc.
3. Identify KPIs which are directly linked with student performance in Board examination
4. Detailed analysis and visualisations to generate actionable insights and reports for recommendation
5. Interactive visualisations for actionable insights to trigger responses across all the levels/departments
6. Provide personalised recommendation to schools for performance enhancement e.g., Student-Teacher ratio

Technological Features

Sqube leverages the power of open-source technology to create a robust and scalable data analysis platform. This strategic choice fosters transparency, reduces licensing costs, and fosters a collaborative development community. The platform is built upon open standards and utilizes secure APIs, enabling seamless interoperability with existing CBSE systems and future technology advancements.

For deeper analysis, **fully interactive** dashboards with **drill-down** features allow users to explore data at granular levels. **Automated insights** generated by the system translate complex data into actionable recommendations, saving time and resources for CBSE officials. The platform caters to a vast network of stakeholders, including **30000+ schools, 1.29 million+ teachers, and 27million+ students**, along with multiple CBSE departments. A robust **user access management** system ensures data security and grants access based on user roles

and permissions. The platform also tracks user activity, enabling administrators to monitor usage patterns and optimize the system for user needs.

To ensure accessibility for all users, Sqube offers open data access for specific datasets, while maintaining **secure data practices** for sensitive information. **Responsive design** guarantees a seamless user experience across devices and browsers. By adopting **open-source principles** throughout its development (built on, built as, and using open standards), Sqube fosters future innovation and ensures long-term **sustainability**.

The system boasts the capability of handling **16 billion+ data points across 600+ Key Performance Indicators (KPIs)**, empowering CBSE with a comprehensive view of the educational landscape. Real-time data updates and processing ensure information remains fresh and actionable.

2) Cyber Crisis Management Plan (CCMP) R 2.0

With the increasing penetration of Information Technology, various domains of CBSE are now increasingly dependent on network of critical infrastructure. As such any disruptions of IT operations of CBSE is likely to have a devastating effect on stakeholders and essential services being offered by the Board. In view of the potential impact, protection of data & systems, a Comprehensive Cyber Crisis Management Plan (CCMP) was prepared in consultation with MoE & CERT-In and implemented in CBSE to ensure that disruptions are prevented and possible damage averted.
