

CENTRAL BOARD OF SECONDARY EDUCATION

POLICY TO ADDRESS THE ANOMALIES IN QUESTION PAPERS

CBSE is holding Class-X and Class-XII Board Examinations for lakhs of students every year who are appearing in the examinations from about 5000 examination centres in India and in 25 countries abroad and growing every year.

In case, if any anomaly is noticed after Question Paper is administered on the day of examination, it is not possible to communicate the solution of the same to all the centres. CBSE has a mechanism to address issues of anomaly in Question Papers as under: -

1. Observations are obtained from subject experts on the day of examination.
2. Observations on the Question Paper are obtained from all schools within 24 Hrs of the conduct of examination
3. Information received within 24 hours of the conduct of examination from other sources is also taken into consideration

All observations are compiled and provided to the group preparing Marking Schemes to make the provision to address the anomaly in such a manner that students interest is protected.
