

Marking Scheme Strictly Confidential (For Internal and Restricted use only) Senior Secondary Supplementary School Examination, 2026 (XIIth) SUBJECT NAME -ACCOUNTANCY (Q.P. CODE /Set No. 67/7/2)	
<u>General Instructions: -</u>	
1	You are aware that evaluation is the most important process in the actual and correct assessment of the candidates. A small mistake in evaluation may lead to serious problems which may affect the future of the candidates, education system and teaching profession. To avoid mistakes, it is requested that before starting evaluation, you must read and understand the spot evaluation guidelines carefully.
2	“Evaluation policy is a confidential policy as it is related to the confidentiality of the examinations conducted, evaluation done and several other aspects. Its leakage to public in any manner could lead to derailment of the examination system and affect the life and future of millions of candidates. Sharing this policy/document to anyone, publishing in any magazine and printing in Newspaper/Website, etc. may invite action under various rules of the Board and IPC.”
3	Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one’s own interpretation or any other consideration. Marking Scheme should be strictly adhered to and religiously followed. However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and due marks be awarded to them. In Class-XII, while evaluating two competency-based questions, please try to understand given answer and even if reply is not from marking scheme but correct competency is enumerated by the candidate, due marks should be awarded.
4	The Marking scheme carries only suggested value points for the answers. These are in the nature of Guidelines only and do not constitute the complete answer. The students can have their own expression and if the expression is correct, the due marks should be awarded accordingly.
5	The Head-Examiner must go through the first five answer books evaluated by each evaluator on the first day, to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. If there is any variation, the same should be zero after deliberation and discussion. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
6	Evaluators will mark (✓) wherever answer is correct. For wrong answer CROSS ‘X’ be marked. Evaluators will not put right (✓) while evaluating which gives an impression that answer is correct and no marks are awarded. This is most common mistake which evaluators are committing
7	If a question has parts, please award marks on the right-hand side for each part. Marks awarded for different parts of the question should then be totalled up and written in the left-hand margin and encircled. This may be followed strictly.
8	If a question does not have any parts, marks must be awarded in the left-hand margin and encircled. This may also be followed strictly.
9	If a student has attempted an extra question, answer of the question deserving more marks should be retained and the other answer scored out with a note “Extra Question” .
10	No marks to be deducted for the cumulative effect of an error. It should be penalized only once.
11	A full scale of marks 80 marks as given in Question Paper) has to be used. Please do not hesitate to award full marks if the answer deserves it.
12	Every examiner has to necessarily do evaluation work for full working hours i.e., 8 hours every day and evaluate 20 answer books per day in main subjects and 25 answer books per day in other subjects (Details are given in Spot Guidelines). This is in view of the reduced syllabus and number of questions in question

	paper.
13	Ensure that you do not make the following common types of errors committed by the Examiner in the past: • Leaving answer or part thereof unassessed in an answer book. • Giving more marks for an answer than assigned to it. • Wrong totalling of marks awarded on an answer. • Wrong transfer of marks from the inside pages of the answer book to the title page. • Wrong question wise totalling on the title page. • Wrong totalling of marks of the two columns on the title page. • Wrong grand total. • Marks in words and figures not tallying/not same. • Wrong transfer of marks from the answer book to online award list. • Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.) • Half or a part of answer marked correct and the rest as wrong, but no marks awarded
14	While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as cross (X) and awarded zero (0) Marks
15	Any unassessed portion, non-carrying over of marks to the title page, or totaling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
16	The Examiners should acquaint themselves with the guidelines given in the “ Guidelines for Spot Evaluation ” before starting the actual evaluation.
17	Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totalled and written in figures and words.
18	The candidates are entitled to obtain photocopy of the Answer Book on request on payment of the prescribed processing fee. All Examiners/Additional Head Examiners/Head Examiners are once again reminded that they must ensure that evaluation is carried out strictly as per value points for each answer as given in the Marking Scheme.

67 /7 /2	MARKING SCHEME ACCOUNTANCY (055) EXPECTED ANSWERS / VALUE POINTS	Marks
	SECTION A	
1	Q. Assertion (A) : At the time of dissolution..... Ans. (A) Both Assertion (A) and Reason (R) are true and Reason (R) is the correct explanation of Assertion (A).	1 mark
2	Q. Lily Ltd. forfeited 1,000 shares..... Ans. (B) ₹10,000	1 mark
3	Q. Roshni Ltd. issued 6,000..... Ans. (B) ₹6,00,000	1 mark
4	Q. (a) Reema and Leena were partners... Ans. (B) ₹8,000 OR Q. (b) Gautam and Sunita were partners..... Ans. (A) ₹2,00,000	1 mark OR 1 mark

27	Q. (a) From the following, identify the chart that... Ans. (A) Doughnut chart OR Q. (b) ‘LABELS’ in MS Excel means.... Ans. (D) Both (B) and (C)	1 mark OR 1 mark																												
28	Q. Which window will be used to change the system period on... Ans. (B) ALT + F2	1 mark																												
29	Q. Name the voucher which does not affect the accounts of the user.... Ans. (C) Memo voucher	1 mark																												
30	Q. (a) Which of the following is not a feature of customised... Ans. (D) Training for the Software is not required OR Q. (b) How many auto-formatting styles are available... Ans. (A) 17	1 mark OR 1 mark																												
31	Q. Explain any three advantages of conditional formatting... Ans. Three advantages are : (i) Quick data analysis : Conditional formatting helps by highlighting unusual values and makes data visually appealing by using data bars, colour scales etc. (ii) Improves accuracy : It reduces manual errors by applying colour or format change based on defined condition. (ii) Helps in better decision making : Since the data is analysed clearly and in detail it helps in better decision making.	3 marks																												

32	Q. Explain ‘Chart of Accounts’ in accounting software.... Ans. Chart of Accounts is the Segmentation of liabilities and Assets of Balance Sheet and Income and Expenses of Profit and Loss Account. In the accounting software such chart of accounts is classified into two categories. Such as ledger Accounts. Account Groups : Ledger Account : It represent the assorted summarised and balanced transactions of similar nature. All accounting transactions are linked to ledger account. Account group : It is a convenient method of organising the ledger accounts into a tree structured hierarchical view for better understanding and interpretation.	3 marks
33	Q. (a) A business’ data needs to be guarded from its competitors... Ans. Any of the two with suitable explanation : (i) Password Security: Password is a widely accepted security control to access the data. Only the authorised person can access the data. Any user who does not know the password cannot retrieve information from the system. It ensures data integrity. It uses a binary encoding format of storage and offers access to the database. (ii) Data Audit: Audit feature of accounting software provides the user with administrator rights in order to keep track of unauthorised access to the database. It audits the correctness of entries. Once entries are audited with alterations, if any, the software displays all entries along with the name of the auditor user and the date and time of alteration. (iii) Data Vault: Software provides additional security for the inputted data and this feature is referred to as a data vault. Data vault ensures that original information is preserved and is not tampered with. The data vault password cannot be broken. Some software uses a data encryption method. OR Q. (b) Internal margins are the distance between the text.. Ans. Following are the options available to increase or decrease the amount of internal margins. Left : To specify the distance between the left border of the selected chart element and the text, enter the margin number that we want in the Left box. Right : To Specify the distance between the right border of the selected chart element and the text enter the margin number that we want the right box. Top - To specify _ _ _ _ _ Bottom - To specify _ _ _ _ _	2+2 = 4 marks OR 4 marks
34	Q. When does RATE function return #NUM! error.....	

	Ans. RATE function returns the interest rate per period of an annuity. RATE is calculated by iteration and can have zero or more solutions. If the successive results of RATE do not converge to 0.0000001 after 20 iterations, RATE returns the # <u>Num ! error</u> value. syntax = RATE (nper, pmt, pv, fv, type, guess) where Nper is the total number of payment period in an annuity. Pv is the present value - the total amount that a series of future payments is worth now. Fv is the future value, or a cash balance attained after the last payment is made. If FV is omitted, it is assumed to be 0. Type : is the number 0 or 1 and indicates when payments are due. 0 or omitted means payment is due at the end of the period 1 means payment is due at the beginning of the period. Guess is the guess for what the rate will be, if omitted, it is assumed to be 10%. Significance : It is useful for determining the effective interest rate on loan or investments it supports financial decision making.	6 marks
